REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The closest prior art of Phelps (US 5,382,259) and Ken et al. (US 6,193,708) will be discussed. Phelps discloses an occlusive device for use in interventional therapy comprising a central coil body and at least four coil arms connected to the central body, the coil arms having a primary coil configuration and an expanded secondary configuration (fig. 14 or 16). Phelps fails to disclose or fairly suggest coil arms that are conically shaped having an inner apical end and an outer end, the inner apical end being connected together and to the central body, the coils having an expanding diameter as they radiate outward. Ken et al. also discloses an occlusive device having at least four coil arms formed of a shape memory material having a collapsed primary coil configuration and a 3-D expanded secondary configuration, the arms

being connected to a central body which has a coiled portion (fig. 6a) but fails to disclose or fairly suggest conically shaped coils that have an expanded diameter as they radiate outward. Both references fail to disclose or fairly suggest a shape memory coil having a radiopaque strand having a plurality of intermittently spaced apart, enlarged portions disposed within the outer coil portion.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
